PROJECTS

TalentBridge — Campus Recruitment Platform (In Progress)

Tech Stack: Java, Spring Boot, Spring Security, JWT, React, PostgreSQL, JPA/Hibernate, REST APIs, Git

- Developing a full-stack campus recruitment platform connecting students, recruiters, and administrators.
- Implementing secure JWT-based authentication and role-based authorization using Spring Security.
- Designing REST APIs with a layered Controller–Service–Repository architecture using Spring Boot, PostgreSQL, and JPA/Hibernate.
- React frontend currently under active development.

Global Market Intelligence Hub

Tech Stack: Java, Spring Boot, React, PostgreSQL, Python, Scikit-learn, Docker

- Built a full-stack market intelligence dashboard integrating a Spring Boot/PostgreSQL backend with a React frontend.
- Applied Python and Scikit-learn for data analysis and predictive modeling on market datasets.
- Containerized services with Docker and deployed the application to Vercel for reliable, scalable access.
